Accounting is much more than just numbers. It's about the people behind the numbers. I take pride in investing in my client's journeys, building lasting relationships and ensuring the best outcomes are achieved.

This philosophy is what drew me to work at Walsh Accountants. The whole team here are down to earth, professional and share the same core values. People first and numbers second.

## DESCRIPTION OF ROLE

Jack started working in a public practice accounting firm in March 2016, working predominantly with small businesses and gaining a solid foundation in accounting and tax. Having grown up around small business, Jack has a depth of understanding of their operations and the real issues they face on a day-to-day basis.

Since joining Walsh Accountants, Jack has managed a small team within the office and has worked closely with clients within a range of differing industries and backgrounds. From simple sole trader start-ups to SMEs with aggregated turnover exceeding \$20m.

This experience, coupled with Jack's technical accounting knowledge means he is well equipped to provide meaningful support and advice, including with complex tax matters, business structuring advice, cashflow management and performance reporting.

## PERSONAL INTERESTS

Outside of the office, Jack is an avid bodybuilder, rock climber and enjoys a yearly trip to the Australian ski fields. His favourite down-time is quality time spent with friends and family.
